Technology Lead - Founders office

Position: *Technology Lead (fulltime)*

Location: *Delhi (In Person) office at World Trade Center Narouji Nagar*

Company: *Hrim Innovation LLP*

Experience Level: *3+ years across full-stack development, AI products, and system architecture*

Educational Background: *Degree in computer science, engineering, or related (or equivalent experience*

ABOUT HRIM

Hrim is an innovation company that specializes in 0-1 journeys with a portfolio of internal and external products. We create products and services that are unique, meaningful, and audacious.

https://www.hriminnovation.com/

THE ROLE

A Technology Lead working directly with the founders on high-stakes technical challenges. You'll move between AI products, system architecture, infrastructure, and integrations—whatever the moment demands.

What will you do?

- Build AI-powered products — integrate LLMs, build intelligent features, figure out where AI creates real
- value
- Own technical strategy — from early prototypes to production systems, across internal and external
- projects
- Ship fast and iterate — MVPs over perfect architecture, learn in-market
- Move across the stack — frontend, backend, infrastructure, integrations
- Make smart technical bets — choose the right tools, frameworks, and approaches for each problem
- Collaborate with design — work closely with the Design Lead to bring product concepts to life

Required Skills

- ***AI Development***
  Building with LLMs, prompt engineering, RAG, AI product patterns.
- ***Full-Stack Engineering***
  Frontend, backend, APIs, databases. Comfortable across the stack.
- ***System Architecture***
  Designing systems that are right for the moment. Knowing when to shortcut and when to scale.
- ***Rapid Prototyping***
  Turning ideas into working software quickly. MVPs that validate.
- ***Infrastructure***
  Deployment, DevOps, cloud platforms. Shipping to production.
- ***Integrations***
  APIs, third-party services, connecting systems together.

Required Tools

Proficiency in modern development tools and AI-native workflows — Cursor, Copilot, Claude, ChatGPT, Vercel,
Supabase, Replit, and similar.

CANDIDATE REQUIREMENT

What We're Looking For
- Degree in computer science, engineering, or related (or equivalent experience)
- 3+ years across full-stack development, AI products, and system architecture
- Portfolio of 0 to 1 builds — ideas to working products, not just maintenance
- Strong product instincts — you understand why, not just how
- Comfort with ambiguity
- Pragmatic architecture mindset
- Clear communication
- Self-direction
- AI-native workflow

Bonus Points
- *Experience with LLM APIs (OpenAI, Anthropic, open-source models)*
- *Founder's office, early-stage startup, or technical co-founder experience*
- *Consulting or agency background with multi-domain shipping*

WHY THIS ROLE?
- **Challenge:** Undefined problems, no playbook.
- **Innovation:** 0-1 products that don't exist yet.
- **Leadership:** Learn how technology connects to business strategy. Sit where decisions are made. Grow into technical leadership.

Not for everyone. For engineers who are ready to grow fast.

HOW TO APPLY
Send to careers@hriminnovation.com :
1. Your CV
2. Your GitHub/portfolio
3. A 1–2 minute video essay about the most challenging technical project you undertook

No cover letter needed.
